

# Exercise 7-1: Self-Study: Guardrails Documentation

---

## Objective

Familiarize yourself with n8n's Guardrails node by reading the official documentation before building your own guardrail configuration.

## Prerequisites

None – this is a self-study exercise.

## Your Task

### Read the Documentation

Open the official n8n Guardrails documentation:

<https://docs.n8n.io/integrations/builtin/core-nodes/n8n-nodes-langchain.guardrails/>

### While Reading, Note:

1. **Available guardrail types** – What kinds of guardrails can you configure?
2. **Configuration options** – What settings does each guardrail type offer?
3. **Risk protection** – What specific risks does each guardrail type protect against?

## What to Submit

Your recommendation: which guardrails would you enable for a Changi Airport Group Knowledge Bot, and why?
